“Well insulated, stylish conservatories offer comfortable and practical environments families can use all year round.”

Our choice of traditional and contemporary designs, PVCu colours, finishes and window and door styles is simply second to none. If you need advice, just ask. Our consultants will be delighted to create a design sympathetic to your property, your living requirements and, of course, budget.

# Choosing your conservatory

Deciding which style of conservatory is right for you is fun - but are some key things to consider. Use our tips to help get everything just right...

## 1. Use

What do you hope to get out of your new room? Will it be a study perhaps? Or a play-room? An office? Or maybe just an extra space to relax in. Whatever you choose, its use will determine how large you need your new space to be, and which layout will best accommodate your needs.

## 2. Materials

Your new space should fit seamlessly with your lifestyle. Materials such as PVC-u are incredibly hardwearing and low maintenance. No need for step ladders and re-painting, oil on the hinges and a wipe down every now and again will keep your conservatory looking like new.

## 3. Positioning

Think about the position of your conservatory. Those that face the South will receive the most sun during the day. If this is the case, you may need to consider extra ventilation and possibly blinds in order to block out some of the harsher rays.

## 4. Size

Once you've made a decision on your design, it might be best to check the dimensions of both your house and your garden. A conservatory should be an extension of your current living space, and shouldn't take up valuable garden space.

## 5. Glazing

New advancements have been made to ensure the glass used in conservatories works its hardest for the homeowner. Keeping you cooler in summer and warmer in winter means a conservatory isn't just a seasonal room.

## 6. Planning permission

If you're building a conservatory in England or Wales, you will not usually need planning permission. However, it is always better to be safe than sorry. If you are in any doubt always check as early as you can with your local council.

## Whatever the weather

Our heat reflective glass will ensure you enjoy your conservatory all year round. Its unique coating reflects almost twice as much solar energy as standard glass, and reduces the glare on those bright sunny days.

**When planning how to make the most of your conservatory, there's a lot to consider – its size, shape, and of course, how much sun it gets.**

The unique coating reflects about 69% of total solar energy. Almost twice as much as standard glass.

Reduce potentially expensive heating bills. Our product out-performs standard glass by more than 50%.

Warm edge spacer technology increases the edge temperature by up to 65%.

This product is a world first, offering true self-cleaning glass that never stops working.

Glare is reduced by 44% all year round compared to standard units.
